

Direct Interaction - PRESSAC

PRESSAC our UK based supplier of Data and Voice products will be visiting Dubai at the end of September. Our customers will be given an opportunity to interact directly with the manufacturer's representative to air their views.

Dafnia has been regularly organizing Supplier Interaction Programs, by which our customer gets an opportunity to discuss directly with the manufacturer. These programs have, in the past, been widely accepted and lauded by our customers. These meetings help in getting your misgivings on the product cleared.

PRESSAC has, over the years, listened to your comments on the products and have made many updates / changes in their products to suit our environmental conditions. All our suppliers are ready to listen to actual problems while utilizing their products in the field.

There is no harsher environment than the Middle Eastern desert. All our products are constantly undergoing strenuous tests due to extreme weather conditions of our region. Although we would like to say our products are completely suited for this region, a few times our customers come across situations where they find that the product could be bettered.

PRESSAC has always listened to your complaints and suggestions and have endeavored to incorporate such modification in their products.

PRESSAC product line includes:

- Linejacks
- NTE5 and ADSL
- VDSL and I Plates
- External NTE and Waterproof Boxes
- Connection Boxes
